

How to subscribe to the ABBC podcast:

1. You must use iTunes to subscribe. If you don't have it, you must begin by going to <http://www.apple.com/itunes/download/> to download the software for free. After it is downloaded, install the software.
2. After iTunes is installed, open the iTunes program.
3. On the top menu bar, click "Advanced", and then click "Subscribe to Podcast..."
4. Then a small window will pop up asking for a URL.
5. The URL is: <http://aukebaybiblechurch.org/rss.php>
6. Type this URL exactly into the URL field in iTunes. Then hit OK.

After you hit OK iTunes will subscribe to the podcast and begin downloading the recordings automatically. To minimize bandwidth usage, we limit the number of recordings available to 8, and even this number of recordings may take quite some time to finish downloading (most of our recordings are much longer than the 4 - 10 minute songs you are used to having). Please be patient as the files are downloaded.

The final step is to plug your iPod into your computer and allow your iTunes library to synchronize and add any new songs or recordings to your iPod. After that, you'll be ready to listen to our church recordings.

If you don't have an iPod, you can burn the recordings to an Audio CD, provided that you have a CD Burner.

Thank you for listening, and we hope you find podcasting with ABBC to be a simple and enjoyable activity.
